Production Ready

### Production Ready

RoadRunner can be installed and used in production right away for even the biggest applications under constant load.

High Performance

### High Performance

RoadRunner utilizes goroutines and the multi-threading capabilities of Golang to bring maximum performance to PHP applications.

Works Everywhere

### Works Everywhere

You can download or compile RoadRunner binaries that work on Mac OS, Windows, Linux, FreeBSD, and ARM.

Golang Extensions

### Golang Extensions

RoadRunner provides a flexible framework that allows you to integrate any Golang library with your application using Goridge RPC protocol.

Rich Error Management

### Rich Error Management

RoadRunner supports effective application, server and protocol error handling. You can also connect custom handlers or reporters like Sentry, Prometheus, etc.

HTTP/2, gRPC, PSR-7

## HTTP/2, gRPC, PSR-7

RoadRunner offers a versatile foundation library that allows for running your application under HTTP/2, gRPC, Queue, etc.
